

Collaboration Security

Complete and holistic security for your Microsoft 365 environment

COLLABORATION SECURITY

- **Robust threat detection:** 5 layers of protection from modern content based threats. Detect any known or unknown advanced attack in seconds, including malicious content hidden within clean content.
- **Dynamic content scanning:** Replace or augment your Microsoft Defender for Office 365 with a solution that dynamically scans every single piece of content, including URLs and files, for threats.
- **24/7 incident response:** Have direct access to cyber security experts that are monitoring, analyzing and reporting on all incidents to ensure maximum security.
- **Rapid deployment:** SaaS-based solution that can be quickly implemented without requiring changes to the network infrastructure.

THE ACRONIS PLATFORM ADVANTAGE

Have the most complete Microsoft 365 protection in a single platform:

- Backup
- Email Security
- Collaboration Security
- Email Archiving
- Security Posture Management for Microsoft 365
- Security Awareness Training

Plus, backup for 30+ other workloads with natively-integrated, EDR, XDR, MDR and disaster recovery.

Complete security for Microsoft 365

Defend Microsoft 365 against all threats. Instantly block email threats and secure Microsoft 365 by scanning all files and URLs across Teams, OneDrive and SharePoint for cyber risks.

Reduce TCO and eliminate CAPEX

Cut cyber protection costs and increase predictability. Consolidate vendors, simplify management and reduce security risks by completely protecting Microsoft 365 and other workloads with Acronis.

FEATURES AT A GLANCE

Anti-evasion

Detects malicious content hidden within clean content. Recursively unpacks files and URLs which are then dynamically checked by the rest of the layers in under 30 seconds.

Anti-phishing

Detects malicious URLs based on four leading URL reputation engines in combination with an advanced image recognition technology and AI to validate the legitimacy of URLs.

Threat intelligence

Combines multiple threat intelligence sources with a unique, internally developed engine that scans URLs and files in the wild.

Static detection

Combines top-tier AV engines with proprietary algorithms to detect complex signatures, evasive malware, ransomware and more.

Next-generation dynamic detection

Prevent advanced attacks such as APTs and zero days that conventional defenses miss.
