

The Acronis logo is displayed in white text on a dark blue rectangular background. To the left of the logo, there is a large, stylized graphic of a server rack composed of blue cubes and a central server unit with glowing blue lights.

Safeguard Microsoft 365 data with **Acronis** Cyber Protect

The most reliable and easy-to-use protection solution

Why third-party Microsoft 365 backup is critical

Microsoft 365 has become the go-to productivity solution for many companies. More than 400 million active monthly users rely on Microsoft 365, according to Microsoft. Meanwhile, many of them still operate under a dangerous misconception that Microsoft provides full-fledged data protection for Microsoft 365.

As explicitly stated in its Service Agreement, Microsoft provides infrastructure resilience and high availability; data protection remains the customer's responsibility. Without third-party backup, sensitive business data such as emails or shared files stored in Microsoft 365 are not protected from data loss issues.

Protect your Exchange Online, OneDrive for Business, SharePoint Online, Microsoft Teams, and Microsoft 365 Groups and public folders with Acronis Cyber Protect, which includes unlimited, free cloud storage. It provides a secure cloud-to-cloud backup solution that helps you safeguard your Microsoft 365 data, reduce expenses and ensure business continuity.

Acronis Cyber Protect for Microsoft 365 lets you work worry free

Access backed-up Microsoft 365 data quickly with powerful search capabilities.

Maintain compliance with legal and regulatory mandates.

Ensure business continuity and meet shorter RTOs (recovery time objectives).

Protect Microsoft 365 data from accidental deletions and a wide range of cyberthreats.

Why Acronis Cyber Protect for Microsoft 365?

Convenient agentless backup

No need to install anything, as an agent is already running in a secure Acronis cloud environment.

Automatic protection of new Microsoft 365 resources

Automatically detect and protect new Microsoft 365 users, groups and sites.

Quick granular restore

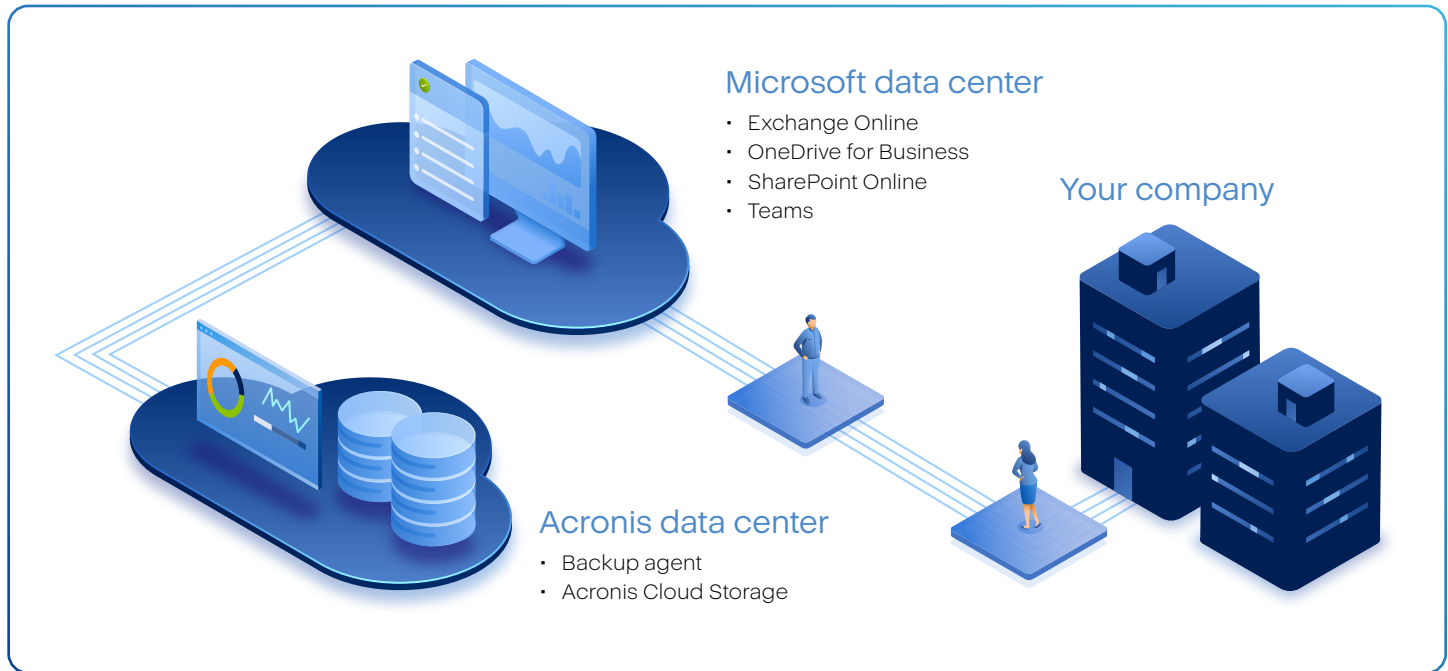

Safely back up and restore emails, files, sites, contacts and attachments in seconds.

One solution for any workload

Protect 30+ workload types, including physical, virtual, cloud or mobile, from a single platform.

Effortless backup with cloud deployment

With Acronis Cyber Protect, you can back up your data from Microsoft data centers directly to highly secure Acronis data centers. Acronis operates a global network of 50+ data centers — meaning your data can be stored where you want, ensuring your regulatory compliance and connectivity requirements are met.

Key features to protect your Microsoft 365 data

Intuitive user interface

Administer the Acronis solution and perform backup tasks using a user-friendly, modern interface. Reduce costs and time spent learning the solution and implementing it.

Group management for Microsoft 365 seats

Streamline protection management for multiple Microsoft 365 seats and create static or dynamic groups based on Microsoft Entra ID data. No need to configure protection for each individual workload, saving time.

Increased backup frequency

Provide greater confidence and productivity with up to six daily backups of Microsoft 365, reducing RPO (recovery point objective) and ensuring no data loss between backups.

Microsoft 365 email archiving

Get long-term cloud-hosted storage of critical Microsoft 365 emails with unlimited cloud storage for purposes like e-discovery, customer retention, legal holds and user activity monitoring.
